# EmpSatisfaction

Human resources (HR) professionals face the challenge of sorting through numerous job applications to identify the most qualified candidates. They must also balance the needs of the organization with the desires and goals of individual employees. Analyzing previous recruitment data is essential to inform future hiring decisions and predict future hiring needs. Success in the HR job requires strong analytical skills, attention to detail, and the ability to balance competing demands. Ultimately, the goal of HR is to ensure that the organization has the right people in the right roles to achieve its objectives.

How to find the employee satisfaction depending on the gender?

How to find the race by department?
